Quality

Our Slaughtering and Processing Plant is registered in "Listado de Establecimientos Exportadores de Productos Precuero" (LEEPP) of Chile authorized by the competent health authority, "Servicio Agrícola y Ganadero" (SAG).

From this, we are in constant opening of enabling to different markets worldwide.

The basis of this enabling focuses on compliances of high standard of quality and food safety, in terms of infrastructure, equipment and operation, also "SAG" is doing periodical inspections. In addition, our Plant has Standard Certifications "FSSC 22000" protecting our Food Safety Management System.

Supplying

In the green grassland of Chilean Patagonia surrounded of ancient forest and watered by the rivers of the Andes Mountains, free from important diseases like: Aphthous fever and the BSE (the disease of the “mad cows”), graze the animals that all through the year supply our cal's storage plant.

A close relationship with the cattle dealers of the region and the fact that we are near the origin lands, supports a direct, serious and clear commercialization process. All in the direct benefit of producing high quality beef products for Chile and the World.

People and Productivity

Our purpose as an organization is to INDUCE the ENJOY of LIFE through the FOOD. Connecting with people, their needs and experiences, exploring their ways and moments of consume, offering products and service beyond meat.

In our Plant in Valdivia we are a team of 650 collaborators, they are in the center of our actions and our doing, we are working very hard and for this reason we have been building a series of innovate customizable and flexibles benefits that are adapted to the needs of the people that make this great human group.
